

ASPMF 720: CLINICAL PRACTICUM I

This is the first course in a sequence of three to improve the fellow's knowledge and skill in acute pain management practices throughout the perioperative period. Fellows attend an on-campus intensive covering all aspects of essential ultrasound-guided regional anesthesia procedures to include anatomist-guided cadaveric dissections, needling practice on whole-body cadavers, live model scanning, and neuromuscular assessment. This knowledge is translated into clinical practice during clinical rotations at affiliate sites under the mentorship of preceptors.
